

Clinical Study

ImpediMed Limited, in conjunction with QUT, is looking for volunteers to take part in our project to collect data to create a reference range for the assessment of lymphoedema.

Eligible participants must:

- Be aged between 18 and 75 years.
- Describe themselves as generally healthy.

Eligible participants must Not:

- Have any known lymphatic disorder.
- Have an implanted cardiac device such as a pacemaker or an ICD.
- Have any known heart, thyroid or kidney disease.
- Have a surgical history (including surgery for cancer of any type).
- Be on medication such as diuretics, blood pressure medication, thyroid medication.
- Be pregnant or breast feeding.
